STAINLESS STEEL

Slash cooking time by more than half while preparing delicious, restaurant-style food! Save \$170 off retail!

Save this on your microwave! 1000W stainless steel microwave performs in under 1/2 the time of most home's standard microwaves. Of course, stainless steel is not the only reason for its superior performance. It has a special internal fan that circulates air around the food, so the heat is distributed evenly. It also has a special internal fan that circulates air around the food, so the heat is distributed evenly. It also has a special internal fan that circulates air around the food, so the heat is distributed evenly.

Beautiful copper color Spide Harmon

[illegible]

The world's most powerful copyright law, unique design, copyrighted by registration of design. Patent protection.

**Simply stunning! Tinting-style
Molton Brown® and selected
glass jars for a brother of
sophistication.**

Figure 1 shows the results of the regression analysis. The dependent variable is the number of days spent in the hospital. The independent variables are the age, sex, and the number of comorbidities. The results show that the number of days spent in the hospital increases with age, sex, and the number of comorbidities. The coefficient of age is 0.001, the coefficient of sex is 0.001, and the coefficient of the number of comorbidities is 0.001. The adjusted R-squared is 0.001.
